TABLE 6.--CLASSIFICATION OF THE SOILS

(An asterisk in the first column indicates that the soil is a taxadjunct to the series. See text for a description of those characteristics of the soil that are outside the range of the series)

| Soil name            | Family or higher taxonomic class                                              |
|----------------------|-------------------------------------------------------------------------------|
| Akerue-----          | Clayey-skeletal, montmorillonitic, frigid, shallow Xerollic Durargids         |
| Alley-----           | Fine-loamy, mixed, mesic Durixerollic Haplargids                              |
| Allor-----           | Fine-loamy, mixed, mesic Durixerollic Haplargids                              |
| Alyan-----           | Fine, montmorillonitic, frigid Aridic Argixerolls                             |
| Antel-----           | Fine-silty, mixed, mesic Duric Camborthids                                    |
| Argenta-----         | Coarse-loamy, mixed (calcareous), mesic Aeris Halaquepts                      |
| Atlow-----           | Loamy-skeletal, mixed, mesic Lithic Xerollic Haplargids                       |
| Attella-----         | Loamy-skeletal, mixed (calcareous), frigid Lithic Xeric Torriorthents         |
| Batan-----           | Fine-silty, mixed (calcareous), mesic Durorthidic Torriorthents               |
| Belate-----          | Loamy-skeletal, mixed, frigid Aridic Argixerolls                              |
| Beoska-----          | Fine-loamy, mixed, mesic Duric Natrargids                                     |
| Beowawe-----         | Fine-loamy, mixed, mesic Duric Natrargids                                     |
| Beowawe Variant----- | Fine-loamy over sandy or sandy-skeletal, mixed, mesic Typic Natrargids        |
| Berning-----         | Clayey-skeletal, montmorillonitic, mesic Xerollic Haplargids                  |
| Bloya-----           | Fine-loamy, mixed, mesic Xerollic Durorthids                                  |
| Blacka-----          | Coarse-loamy, mixed, mesic Entic Durorthids                                   |
| Blackhawk-----       | Loamy, mixed, mesic, shallow Entic Durorthids                                 |
| Bojo-----            | Loamy, mixed, mesic Lithic Haplargids                                         |
| *Boulflat-----       | Fine-loamy, mixed, mesic Haploxerollic Durargids                              |
| Bregar-----          | Loamy-skeletal, mixed, frigid Lithic Xerollic Haplargids                      |
| Broyles-----         | Coarse-loamy, mixed, mesic Duric Camborthids                                  |
| Bubus-----           | Coarse-loamy, mixed (calcareous), mesic Durorthidic Torriorthents             |
| Bucan-----           | Fine, montmorillonitic, frigid Xerollic Haplargids                            |
| Buffaran-----        | Clayey, montmorillonitic, mesic, shallow Xerollic Durargids                   |
| Burnborough-----     | Loamy-skeletal, mixed, frigid Aridic Argixerolls                              |
| Burrita-----         | Clayey-skeletal, montmorillonitic, mesic Lithic Xerollic Haplargids           |
| Caniwe-----          | Fine-silty, mixed, mesic Aridic Duric Haploxerolls                            |
| Chen-----            | Clayey-skeletal, montmorillonitic, frigid Lithic Argixerolls                  |
| Cherry Spring-----   | Fine-loamy, mixed, mesic Haploxerollic Durargids                              |
| Chiara-----          | Loamy, mixed, mesic, shallow Xerollic Durorthids                              |
| Clan Alpine-----     | Loamy-skeletal, mixed, frigid Typic Argixerolls                               |
| Cleavage-----        | Loamy-skeletal, mixed, frigid Lithic Argixerolls                              |
| Colbar-----          | Fine-loamy, mixed, mesic Xerollic Haplargids                                  |
| Cortez-----          | Fine, montmorillonitic, mesic Xerollic Nadurargids                            |
| Coztur-----          | Loamy, mixed, frigid Lithic Xerollic Haplargids                               |
| Creemon-----         | Coarse-silty, mixed, mesic Duric Camborthids                                  |
| Cren-----            | Coarse-silty, mixed (calcareous), mesic Durorthidic Torriorthents             |
| Davey-----           | Sandy, mixed, mesic Xerollic Camborthids                                      |
| Desatoya-----        | Clayey over loamy-skeletal, montmorillonitic, mesic Durixerollic Haplargids   |
| Dewar-----           | Loamy, mixed, mesic, shallow Xerollic Durargids                               |
| Doowak-----          | Sandy-skeletal, mixed, mesic Xeric Torriorthents                              |
| Duffer-----          | Fine-silty, carbonatic, mesic Aquic Calcorthids                               |
| Dun Glen-----        | Coarse-loamy, mixed, mesic Typic Camborthids                                  |
| Dunphy-----          | Coarse-loamy, mixed (calcareous), mesic Aeris Halaquepts                      |
| Enko-----            | Coarse-loamy, mixed, mesic Durixerollic Camborthids                           |
| Filiran-----         | Fine, montmorillonitic, mesic Haploxerollic Nadurargids                       |
| Floer-----           | Clayey-skeletal, montmorillonitic, frigid Aridic Palexerolls                  |
| Genaw-----           | Loamy, mixed, mesic, shallow Xerollic Haplargids                              |
| Ginex-----           | Loamy-skeletal, mixed, mesic, shallow Xerollic Haplargids                     |
| Glean-----           | Loamy-skeletal, mixed, frigid Pachic Haploxerolls                             |
| Golconda-----        | Fine-loamy, mixed, mesic Haplic Nadurargids                                   |
| Goldrun-----         | Mixed, mesic Xeric Torripsamments                                             |
| Graley-----          | Clayey-skeletal, montmorillonitic, frigid Lithic Argixerolls                  |
| Graley Variant-----  | Clayey-skeletal, montmorillonitic, frigid Lithic Argixerolls                  |
| Grassval-----        | Loamy, mixed, mesic, shallow Xerollic Durargids                               |
| Grina-----           | Loamy, mixed (calcareous), mesic, shallow Xeric Torriorthents                 |
| Gund-----            | Fine-silty over clayey, mixed, nonacid, mesic Aquic Durorthidic Torriorthents |
| Handy-----           | Fine, montmorillonitic, frigid Xerollic Haplargids                            |
| Hapgood-----         | Loamy-skeletal, mixed Pachic Cryoborolls                                      |
| Havingdon-----       | Clayey-skeletal, montmorillonitic, mesic Xerollic Haplargids                  |
| Hessing-----         | Coarse-loamy, mixed, mesic Typic Camborthids                                  |

TABLE 6.--CLASSIFICATION OF THE SOILS--Continued

| Soil name           | Family or higher taxonomic class                                        |
|---------------------|-------------------------------------------------------------------------|
| Hooplite-----       | Loamy-skeletal, mixed, mesic Lithic Xerollic Haplargids                 |
| Hopeka-----         | Loamy-skeletal, carbonatic, frigid Lithic Xeric Torriorthents           |
| Humboldt-----       | Fine, montmorillonitic (calcareous), mesic Fluvaquentic Haplaquolls     |
| Humdun-----         | Coarse-loamy, mixed, frigid Durixerollic Camborthids                    |
| Isolde-----         | Mixed, mesic Typic Torripsamments                                       |
| Itca-----           | Clayey-skeletal, montmorillonitic, frigid Lithic Argixerolls            |
| Izod-----           | Loamy-skeletal, carbonatic, mesic Lithic Xeric Torriorthents            |
| Jenor-----          | Coarse-loamy, mixed, mesic Typic Durorthids                             |
| Jung-----           | Clayey-skeletal, montmorillonitic, mesic Lithic Xerollic Haplargids     |
| Kelk-----           | Fine-silty, mixed, mesic Durixerollic Camborthids                       |
| Kingingham-----     | Fine, montmorillonitic, mesic Typic Nadurargids                         |
| Kodra-----          | Coarse-loamy, mixed, mesic Haploxerollic Durorthids                     |
| Koynik-----         | Loamy-skeletal, carbonatic, mesic Lithic Torriorthents                  |
| Koynik Variant----- | Loamy-skeletal, mixed (calcareous), mesic Lithic Torriorthents          |
| Kram-----           | Loamy-skeletal, carbonatic, mesic Lithic Xeric Torriorthents            |
| Kram Variant-----   | Loamy-skeletal, mixed (calcareous), mesic Lithic Xeric Torriorthents    |
| Landco-----         | Coarse-silty over clayey, mixed (calcareous), mesic Typic Torriorthents |
| Laped-----          | Loamy, mixed, mesic, shallow Typic Durargids                            |
| Layview-----        | Loamy-skeletal, mixed Argic Lithic Cryoborolls                          |
| Linrose-----        | Loamy-skeletal, mixed, frigid Aridic Haploxerolls                       |
| Locane-----         | Clayey-skeletal, montmorillonitic, frigid Lithic Xerollic Haplargids    |
| Loncan-----         | Loamy-skeletal, mixed, frigid Aridic Haploxerolls                       |
| Loncan Variant----- | Loamy-skeletal, mixed, frigid Aridic Haploxerolls                       |
| Malpais-----        | Loamy-skeletal, mixed, mesic Typic Camborthids                          |
| McConnel-----       | Sandy-skeletal, mixed, mesic Xerollic Camborthids                       |
| McVegas-----        | Clayey-skeletal, montmorillonitic, mesic, shallow Haplic Nadurargids    |
| Midraw-----         | Clayey, montmorillonitic, mesic, shallow Xerollic Durargids             |
| *Millerlux-----     | Clayey, montmorillonitic, frigid Lithic Xerollic Haplargids             |
| Minat-----          | Loamy-skeletal, mixed, mesic Xerollic Camborthids                       |
| Misad-----          | Loamy-skeletal, mixed (calcareous), mesic Durorthidic Torriorthents     |
| Needle Peak-----    | Fine-silty, mixed (calcareous), mesic Aquic Torriorthents               |
| Newpass-----        | Fine, montmorillonitic, mesic Haploxerollic Nadurargids                 |
| Ninemile-----       | Clayey, montmorillonitic, frigid Lithic Argixerolls                     |
| Norfork-----        | Clayey, montmorillonitic, mesic, shallow Xerollic Durargids             |
| Ocala-----          | Fine-silty, mixed (calcareous), mesic Aeris Halaquepts                  |
| *Old Camp-----      | Loamy-skeletal, mixed, mesic Lithic Xerollic Haplargids                 |
| Orovada-----        | Coarse-loamy, mixed, mesic Durixerollic Camborthids                     |
| Osoll-----          | Loamy-skeletal, mixed, mesic, shallow Typic Durorthids                  |
| Osoll Variant-----  | Loamy-skeletal, mixed, mesic Typic Durorthids                           |
| Oxcorel-----        | Fine, montmorillonitic, mesic Duric Natrargids                          |
| Packer-----         | Loamy-skeletal, mixed Argic Cryoborolls                                 |
| Paranat-----        | Fine-silty, mixed (calcareous), mesic Fluvaquentic Haplaquolls          |
| Perlor-----         | Loamy, mixed (calcareous), mesic, shallow Typic Torriorthents           |
| Pernty-----         | Loamy-skeletal, mixed, frigid Lithic Argixerolls                        |
| Perwick-----        | Coarse-loamy, mixed (calcareous), mesic Xeric Torriorthents             |
| Pineval-----        | Loamy-skeletal, mixed, mesic Durixerollic Haplargids                    |
| Prida-----          | Fine-silty, mixed (calcareous), mesic Aquic Durorthidic Torriorthents   |
| Puett-----          | Loamy, mixed (calcareous), mesic, shallow Xeric Torriorthents           |
| Pumper-----         | Sandy-skeletal, mixed, mesic Typic Camborthids                          |
| Punchbowl-----      | Loamy, mixed, frigid Lithic Xerollic Haplargids                         |
| Quarz-----          | Clayey-skeletal, montmorillonitic, frigid Aridic Argixerolls            |
| Raglan-----         | Fine-loamy, mixed, mesic Duric Camborthids                              |
| Rasille-----        | Coarse-silty, mixed, mesic Durixerollic Camborthids                     |
| Redflame-----       | Loamy-skeletal, mixed, mesic Duric Haplargids                           |
| Rednik-----         | Loamy-skeletal, mixed, mesic Typic Haplargids                           |
| Reese-----          | Fine-loamy, mixed (calcareous), mesic Aeris Halaquepts                  |
| Reina-----          | Clayey-skeletal, montmorillonitic, mesic, shallow Xerollic Durargids    |
| Relley-----         | Fine-silty, mixed, mesic Duric Camborthids                              |
| Reluctan-----       | Fine-loamy, mixed, frigid Aridic Argixerolls                            |
| Ricert-----         | Fine-loamy, mixed, mesic Duric Natrargids                               |
| Rixie-----          | Fine-loamy, mixed, mesic Aquic Duric Haploxerolls                       |
| Robson-----         | Clayey-skeletal, montmorillonitic, frigid Lithic Xerollic Haplargids    |
| Roca-----           | Clayey-skeletal, montmorillonitic, frigid Xerollic Haplargids           |
| Rose Creek-----     | Coarse-loamy, mixed, mesic Fluvaquentic Haploxerolls                    |

TABLE 6.--CLASSIFICATION OF THE SOILS--Continued

| Soil name            | Family or higher taxonomic class                                                     |
|----------------------|--------------------------------------------------------------------------------------|
| Rosney-----          | Fine-silty, mixed (calcareous), mesic Typic Torriorthents                            |
| Settlemyer-----      | Fine-loamy, mixed, mesic Fluvaquentic Haplaquolls                                    |
| Shabliss-----        | Loamy, mixed, mesic, shallow Haploxerollic Durorthids                                |
| Skullwak-----        | Fine, montmorillonitic (calcareous), mesic Aeris Halaquepts                          |
| Slaven-----          | Clayey-skeletal, montmorillonitic, frigid Aridis Argixerolls                         |
| Snapp-----           | Clayey over sandy or sandy-skeletal, montmorillonitic, mesic Durixerollic Natrargids |
| Sodhouse-----        | Loamy, mixed, mesic, shallow Typic Durorthids                                        |
| Softscrabble-----    | Loamy-skeletal, mixed, frigid Pachic Argixerolls                                     |
| Sombrero-----        | Loamy, mixed, mesic, shallow Aquentic Durorthids                                     |
| Sonoma-----          | Fine-silty, mixed (calcareous), mesic Aeris Fluvaquents                              |
| Sonoma Variant-----  | Coarse-silty, mixed (calcareous), mesic Typic Fluvaquents                            |
| Soolake-----         | Sandy, mixed, mesic Typic Torriorthents                                              |
| Spike-----           | Loamy-skeletal, mixed, mesic Typic Haplargids                                        |
| Stingdorn-----       | Loamy-skeletal, mixed, mesic, shallow Typic Durargids                                |
| Sumine-----          | Loamy-skeletal, mixed, frigid Aridis Argixerolls                                     |
| Susie Creek-----     | Fine, montmorillonitic, frigid Durargidic Argixerolls                                |
| Teguro-----          | Loamy, mixed, frigid Lithic Argixerolls                                              |
| Teman-----           | Fine-silty, mixed, mesic Durixerollic Calciorthids                                   |
| Tenabo-----          | Loamy, mixed, mesic, shallow Typic Nadurargids                                       |
| Tessfive-----        | Loamy, mixed (calcareous), mesic Lithic Xeric Torriorthents                          |
| Tomera-----          | Fine, montmorillonitic, mesic Xerollic Natrargids                                    |
| Trunk-----           | Fine, montmorillonitic, mesic Xerollic Haplargids                                    |
| Tulase-----          | Coarse-silty, mixed (calcareous), mesic Durorthidic Xeric Torriorthents              |
| Tusel-----           | Loamy-skeletal, mixed Argic Pachic Cryoborolls                                       |
| *Tweba-----          | Coarse-loamy, mixed (calcareous), mesic Aeris Fluvaquents                            |
| Umberland-----       | Fine, montmorillonitic (calcareous), mesic Aeris Halaquepts                          |
| Unsel Variant-----   | Fine-loamy, mixed, mesic Duric Haplargids                                            |
| Valmy-----           | Coarse-loamy, mixed (calcareous), mesic Durorthidic Torriorthents                    |
| Vanwyper-----        | Clayey-skeletal, montmorillonitic, mesic Xerollic Haplargids                         |
| Veta-----            | Loamy-skeletal, mixed, mesic Xerollic Camborthids                                    |
| Walti-----           | Fine, montmorillonitic, frigid Aridis Argixerolls                                    |

---

The Natural Resources Conservation Service (NRCS) is committed to making its information accessible to all of its customers and employees. If you are experiencing accessibility issues and need assistance, please contact our Helpdesk by phone at 1-800-457-3642 or by e-mail at [ServiceDesk-FTC@ftc.usda.gov](mailto:ServiceDesk-FTC@ftc.usda.gov). For assistance with publications that include maps, graphs, or similar forms of information, you may also wish to contact our State or local office. You can locate the correct office and phone number at <http://offices.sc.egov.usda.gov/locator/app>.

SOIL LEGEND

- AREAS DOMINATED BY SOILS ON BOLSON AND SEMIBOLSON FLOORS
- 1

PLAYAS
- 2

WENDANE-GUND-BATAN: Level and nearly level, very deep, somewhat poorly drained and moderately well drained soils on alluvial flats, alluvial flat remnants, lake plains, and lake plain terraces
- 3

SONOMA-RIXIE-PARANAT: Level and nearly level, very deep, poorly drained soils on axial stream flood plains
- 4

WENDANE-BATAN-BUBUS: Level and nearly level, very deep, somewhat poorly drained, moderately well drained, and well drained soils on alluvial flats and alluvial flat remnants
- 5

TWEBA-WENDANE: Level to gently sloping, very deep, somewhat poorly drained and moderately well drained soils on axial stream flood plains and alluvial flats
- AREAS DOMINATED BY SOILS ON FAN PIEDMONTS AND FAN SKIRTS
- 6

BROYLES-CREEMON-WHOLAN: Nearly level and gently sloping, very deep, well drained soils on fan skirts and inset fans
- 7

OROVADA-BROYLES-SHABLISS: Nearly level to moderately steep, shallow or very deep, well drained soils on fan aprons, fan skirts, and fan piedmont remnants
- 8

BEOSKA-BROYLES-WHIRLO: Nearly level to moderately sloping, very deep, well drained soils on fan piedmont remnants, fan skirts, and inset fans
- 9

RICERT-OROVADA-TENABO: Nearly level to moderately sloping, shallow and very deep, well drained soils on fan piedmont remnants and fan skirts
- 10

BOULFLAT-OROVADA: Gently sloping and moderately sloping, moderately deep and very deep, well drained soils on fan piedmont remnants and fan skirts
- 11

BUFFARAN-ALLOR-CHIARA: Gently sloping to strongly sloping, shallow and very deep, well drained soils on fan piedmont remnants and fan skirts
- 12

BIOYA-CHIARA-CORTEZ: Gently sloping to strongly sloping, shallow and moderately deep, well drained soils on fan piedmont remnants

- AREAS DOMINATED BY SOILS ON FOOTHILLS AND LOW MOUNTAINS
- 13

MCVEGAS-STINGDORN-OLD CAMP: Gently sloping to steep, shallow, well drained soils on foothills
- 14

PUETT-WIELAND-GENAW: Gently sloping to strongly sloping, very deep, well drained soils on mountain valley fans and moderately steep and steep, shallow, well drained soils on low, rolling foothills
- 15

TESSFIVE-PUETT-GENAW: Strongly sloping to steep, shallow, well drained soils on foothills and low mountains
- 16

ROBSON-AKERUE-BUFFARAN: Moderately sloping to steep, shallow, well drained soils on foothills and low mountains
- 17

ROCA-TRUNK-ALLEY: Moderately sloping to very steep, moderately deep and very deep, well drained soils on foothills
- 18

OLD CAMP-COLBAR-RELUCTAN: Strongly sloping to steep, shallow and moderately deep, well drained soils on low mountains
- AREAS DOMINATED BY SOILS ON HIGH MOUNTAINS
- 19

SUMINE-CHEN-ROCK OUTCROP: Rock outcrop and gently sloping to steep, shallow and moderately deep, well drained soils on high mountains
- 20

ITCA-RELUCTAN-PUNCHBOWL: Moderately steep and steep, shallow and moderately deep, well drained soils on high mountains
- 21

QUARZ-WALTI-GLEAN: Strongly sloping to steep, moderately deep and deep, well drained soils on high mountains
- 22

HAPGOOD-SUMINE-CLEAVAGE: Moderately steep to very steep, shallow, moderately deep and very deep, well drained soils on high mountains
